Cinematic Chatter

By Malcolm Miller

Humphrey Bogart comes to the Prince screen Sunday-Monday in one of the strangest stories that has come out of this war. This story is "Saboteur," which is the story of a tank and the fighting plane's devotion to it.

There are really three men in this tank, which is affectionately named "Libellule," and these three men, lumbering across the "front" desert after a hard battle with the enemy, are cut off from their company and, in a last ditch effort, are forced to fight their way back to the front.

During the time they are stuck in the tank, they meet up with a company of Germans and prepare to make a stand against them. "Saboteur" is a story of a tank and the fighting plane's devotion to it.

Save String, Paper For Presents To Men In Service

"Save strong string and box material and start to plan shopping," Postmaster General Frank C. Walker advises American in announcing the rules for mailing of Christmas gifts for Army and Navy personnel overseas.

"This year the Christmas mailing period for both Army and Navy overseas forces is the same—September 15 to October 15. After October 15 no gift parcels may be mailed to a soldier without the presentation of a written request from him.

The great demands upon shipping and the need for giving preference to arms, munitions, medicine and food is the prime reason for the early mailing date. Moreover, gift parcels must travel great distances to reach Army and Navy personnel who are located at remote points, and frequently the transfer of large numbers to new stations necessitates forwarding of the packages and additional time is required.

The response that our people made last year during the overseas mailing period demonstrated that they will cooperate in any measure designed for the welfare

of our armed forces personnel," Mr. Walker said. "It is not easy to concentrate on Christmas gifts in the midst of warm weather here at home but our people recognized the need, and because they want the men and women who are absent from their homes to know that they are not forgotten at Christmas, they took pains to assure prompt delivery of Christmas gifts."

"I know that our people will observe the overseas mailing schedule once more this year but I do wish to stress this fact: More care must be taken in wrapping and packing parcels securely and addressing them clearly and correctly."

"It is not a pleasant thing to visit a postal concentration center and see the numbers of Christmas parcels which will never reach servicemen and servicewomen. Post office personnel have orders to do everything they can to effect delivery of such gifts, because we know how important they are for the happiness of the armed forces. Too frequently, nothing can be done."

"I am sorry that anyone ever mentioned that the size of a shoe box is the approximate limit for packages intended for gift mailings overseas. Unhappily many people have been convinced that a shoe box is the best possible container. We must be mindful that these gifts must travel far, with shipping space crowded. If the gifts are to be protected in transit they must be packed in boxes made of metal, wood, soft fiberboard, or strong double-faced corrugated fiberboard, reinforced with strong gummed paper tape and with strong twine are used, so much the better. If the outer wrapper is crushed—and this is likely to happen—the contents may be prevented if fiberboard boxes are wrapped in heavy paper."

"We are unable to deliver many

parcels which, families and friends sent to men and women overseas last year because they were crushed in transit and the gift and the outside wrapper became separated. We would have been able to make delivery if the address had been shown on the inside wrapper. We advise that everyone write the address of the sender and addressee inside the package as well as outside.

"Christmas gifts mean much to our people overseas. Because strong twine, heavy paper and boxes and fiberboard will prove of real help in making delivery of gifts possible I urge those at home to begin saving these materials now. As time goes on they are going to become even more scarce than they are now."

TO SELL RAILROAD

RICHMOND, Va., Aug. 10. (FNS)—A lower court's approval of a plan for the reorganization of the Seaboard Airline Railway has been upheld by the United States Circuit Court of Appeals.

The plan provides that all of the properties owned by the Seaboard, wholly or in part, be combined and included in one railway system.

Two fundamental features of the plan are reduced capitalization for the new company and the allocation of various kinds of securities among the many classes of secured creditors of the present company.

A basement door two inches thick, pressure treated with sulphate, phosphate and boron salts is fireproofed to resist the heat of

a blowtorch for one hour, according to the American Lumber and Treating Company of Chicago.

"Self-starting" plane tires that start spinning before they touch the ground and thus are able to make extra landings and smooth ones, have been invented by the B. F. Goodrich Company.

The new gyro flange compass, recently announced by Bendix Aviation Corporation, is credited with being the second new compass invented in more than 500 years.

Tomorrow's apartments, according to the Minneapolis-Honeywell Regulator Company, will have conveniences to suit individual tastes, including personal control of heat.

They are patient about waiting

because those Long Distance calls mean so much

A soldier has to line up for a lot of things but we don't like to see him wait too long for a Long Distance call.

Would you mind helping a little by saving the wires from seven to ten for the service men?

That's when thousands of soldiers rush to the telephones at the camps and we'd like to give them first call on Long Distance.
